

# FLARESAFE - Personal Lifesaver

OPTICAL SMOKE DETECTOR    DISTRESS ALARM    LED FLASHLIGHT

FLARE

SAFE™

Compact (14,5 x 4,5 cm). Lightweight (200 gr)  
Shockproof (casing made of military-grade plastics)  
Water-resistant  
Buoyant

## THE SMOKE DETECTOR

- Optical smoke detector – more reliable than an ionizing detector
- Easy to use (to arm, twist the plastic cap at the rear of the unit)
- In a fire, the siren will sound and torch light will automatically switch on
- Piercing siren with sound output up to 120 dB

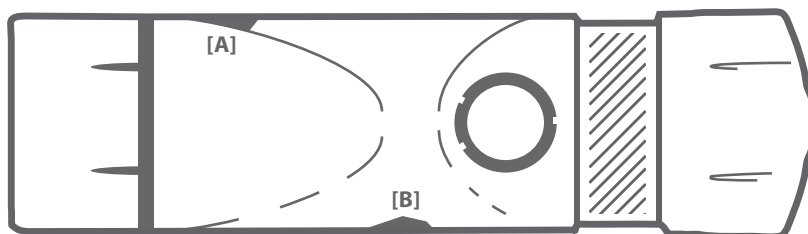

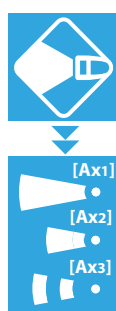

## THE DISTRESS ALARM

- Quick and easy to use (press both orange buttons at the same time)
- Torch light will start flashing when the distress alarm is activated
- Piercing siren with sound output up to 120 dB
- Siren heard up to 300 meters away and will last for more than 60 hours

## THE LED FLASHLIGHT

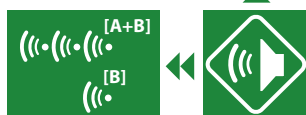

- Press orange button at the front-end of the unit
- 4 LED energy-efficient bulbs
- 3 light functions (full, half-beam and strobe)
- Supplied with 3 batteries (2 AA batteries and 1 lithium battery)
- Lithium battery backs up alarm functions when AA batteries are low
- Warning sounds when lithium battery is nearly drained
- Strobe lasts for 100 hours

1. LED FLASHLIGHT 20m beam / half light / strobe - Rescue visibility up to 2km (SOS lasts up to 100 hrs)

2. 120dB SOS ALARM

Range up to 300m for over 60 hrs. Pulse / continuous mode.

3. SMOKE DETECTOR

Optical portable detector.  
Ideal for hotels and all travel accommodation. Twist to arm.
